DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 10-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Childers et al.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Childers et al. (US Patent Number 6,729,734 B2) discloses:

- Regarding claim 10, a light source (Figure 3, element 62); means for modulating the spectral distribution of light (Figure 3, element 70) and pass modulated light (Figure 3, element 72) toward the display surface (Figure 3, element 78); and reflective means (i.e. DMD; column 3, lines 7-

9) for receiving light from the light source (column 3, lines 3-5) and selectively directing the light between the means for modulating the spectral distribution and the display surface (column 3, lines 10-11).

- Regarding claim 11, the reflective means includes a reflective light modulator (i.e. DMD; column 3, lines 7-9).
- Regarding claim 12, the reflective light modulator includes a digital micro-mirror device (i.e. DMD; column 3, lines 7-9).
- Regarding claim 13, optic means (Figure 1, element 34) for intercepting light reflected towards the display surface (Figure 1, element 16) from the means for modulating and the reflective means (column 3, lines 10-11).

Allowable Subject Matter

3. Claims 1-9 and 15-27 are allowed.
4. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed on 11/07/2005 regarding claims 10-13 have been fully considered but they are not persuasive.
6. The applicant has argued that the prior art does not teach the "reflective means for receiving light from the light source and selectively directing the light between the

Art Unit: 2851

means for modulating the spectral distribution and the display surface". However, Childers et al. teaches such reflective means (i.e. DMD, column 3, lines 7-9) for receiving light from the light source (Figure 3, element 62) and selectively directing (i.e. modulated colored light; column 5, line 36) the light between the means for modulating the spectral distribution (Figure 3, element 70) and the display surface (Figure 3, element 78).

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
